

**George W. Hill Correctional Facility
K-9 Unit
Thornton, PA 19373
610 361-3388**

Our Unit was originally formed in 1975 and has grown to 30 working dogs. The Unit is supervised by a Lieutenant & Sergeant, with nine officer/handlers working three shifts around the clock. The Unit deployments include sentry dogs, dual purpose dogs (drug & patrol) and Bloodhound chase teams.

Over the years we have tried many dog foods with results varying from disastrous to only fair. Our vendor suggested Annamaet on a trial basis and we were so impressed with the results that we have stayed with the brand for almost twenty years now. All of our working dogs are under a high stress situation, whether patrolling outside the facility as a sentry dog or working inside the walls of this highly charged maximum security environment. The diets that Annamaet offers have agreed with our dog's digestive systems and we have never had a problem in that area. We have found that we can manage a dog's weight easier and maintain it more efficiently with the degrees of protein available in their foods. Supplements have also been very beneficial to us. The consistent quality of the products has been exceptional.

We as a working dog unit can highly recommend Annamaet products without reservations.

**Lt. John Miller,
K-9 Supervisor**
